TECHNICAL DATA SHEET

AKVAKOL 100.3

Product type	Modified water-based adhesive based on synthetic polymers, fillers, thickeners, stabilizers and preserving additives.
Application area	Production of cardboard tubes, edge protectors and packaging, folding gluing, cardboard binding, paper bags and other products made of paper and cardboard.
Technical parameters	
Appearance	Dispersion, color white to light-beige
Viscosity	2.000 -9.000 mPa.s Brookfield, 23°C
pH level	4,0 - 5,0
Solid content	40-45%
Operating temperature	Fast setting. Non-toxic, short fixation time and high-quality impregnation onto a cardboard layer. Adhesive joint is resistant to external factors. To achieve the required working viscosity of the adhesive, it is possible to dilute it with water. The dilution ratio is determined in a practical way in each specific case.
Handling	Optimum temperature of use 18-25°C
Shelf life	In closed buckets 6 months from the date of production
Storage	Optimum storage temperature 5-25 °C, protect from frost
